

4 Ways to Use AI For Your Dissertation

AI is technology that aims to replicate human cognitive abilities across many different fields! It's abilities make it the perfect tool to help you strengthen your academic writing skills!

Use AI to find relevant literature

Searching through multiple engines to find academic resources can be a pain. Use an AI like Elicit to instantly create a list of relevant articles to your research topic!

Use a AI to make research articles easy to read

Are you struggling to focus on the dense language of academic literature? Ask an AI like Humata to make your research articles easy to read, create summaries, and compare main ideas amongst multiple articles!

Use AI to create an outline

Are you having a hard time trying to organize that literature review? Ask an AI like Chat GPT to create an outline for your topic. Seriously, you will be surprised how many new headings you can add to your dissertation!

Use AI to check your references

Paste your references into Chapt GPT and ask it if they are in the correct APA7 format. The AI will not only give you a "Yes" or "No" answer, but it will also fill in missing information in your reference!
